Didymo Sampling Procedures

Overview:

This section of the manual covers sampling procedures for Didymo. All procedural documents are created in house, using the knowledge of experience of Horizons staff.

Horizons Procedures:

- Didymo Sampling Procedure – Section 16.2 Appendix 1
- Didymo Sampling Field Sheet (Biosecurity) – Section 16.2 Appendix 2

These procedure documents are updated as necessary by the Discrete Data portfolio holder.

Linked Procedures:

Some of the procedures in this section are based on other nationally accepted procedures, or those created by other governmental bodies; not necessarily from New Zealand.

The Didymo sampling procedure document follows the standards and recommendations found at <http://www.biosecurity.govt.nz/didymo/protocols>
